Preliminary Findings			
<p>This report relates to a match following searching against the National DNA Database.</p> <p>The crime scene DNA profile [INSERT BARCODE] obtained from exhibit [INSERT EXHIBIT NUMBER AND DESCRIPTION] relating to [INSERT SCENE ADDRESS] has generated a match to the DNA profile held on the National DNA Database under the name of [INSERT NAME] [INSERT DATE OF BIRTH] [INSERT BARCODE]</p> <p>PLEASE NOTE: The subject sample [INSERT BARCODE] is a 'pre-PACE' sample that can only be used for intelligence purposes. If there is sufficient appropriate, supporting information to arrest the subject on the basis of this DNA match, the subject can be re-sampled using the PACE DNA Sampling kit and a further DNA profile obtained that is suitable for evidential comparison.</p>			
Evidence Type Supporting / Technical Information			
<p>Technical information, including issues that may affect the interpretation of DNA evidence is available from FSPs, CPS, Knowledge Hub and the National DNA Database documentation websites.</p>			
To the Investigator			
<p>This Forensic Information Report is provided to the investigator and contains information based on a forensic assessment or examination of the crime scene and/or exhibit(s). It can be used to support decisions on lines of enquiry.</p> <p>If further forensic assessment or examination is required, the investigator should contact the relevant Force Forensic Department in accordance with standard force operating procedures.</p>
